Heavy Duty Racking Systems

Racking system allows individual accessibility to all pallets with simple stock rotation. Selective pallet racking provides high volume of storage for pallets. Wide range of products can be stored in selective pallet racking.

Applications

- Raw material storage
- Distribution centres
- Finished goods storage
- Industrial stores

Selective pallet racking system

Selective pallet racking is the most universal system for direct and single access to each pallet.

Double deep pallet

Double Deep Pallet Racking is also a simple & economical racking system which allows 50% selectivity. This racking is suitable for medium or less variety of SKU's irrespective of quantity.

Heavy duty shelving

This is a simple storage solution which facilitates storage of non palletized items. It is ideal for a large variety of medium to big sized items that can be handled manually.

Two tier racking

This system is useful for vertical storage for non palletized items that can be handled manually.

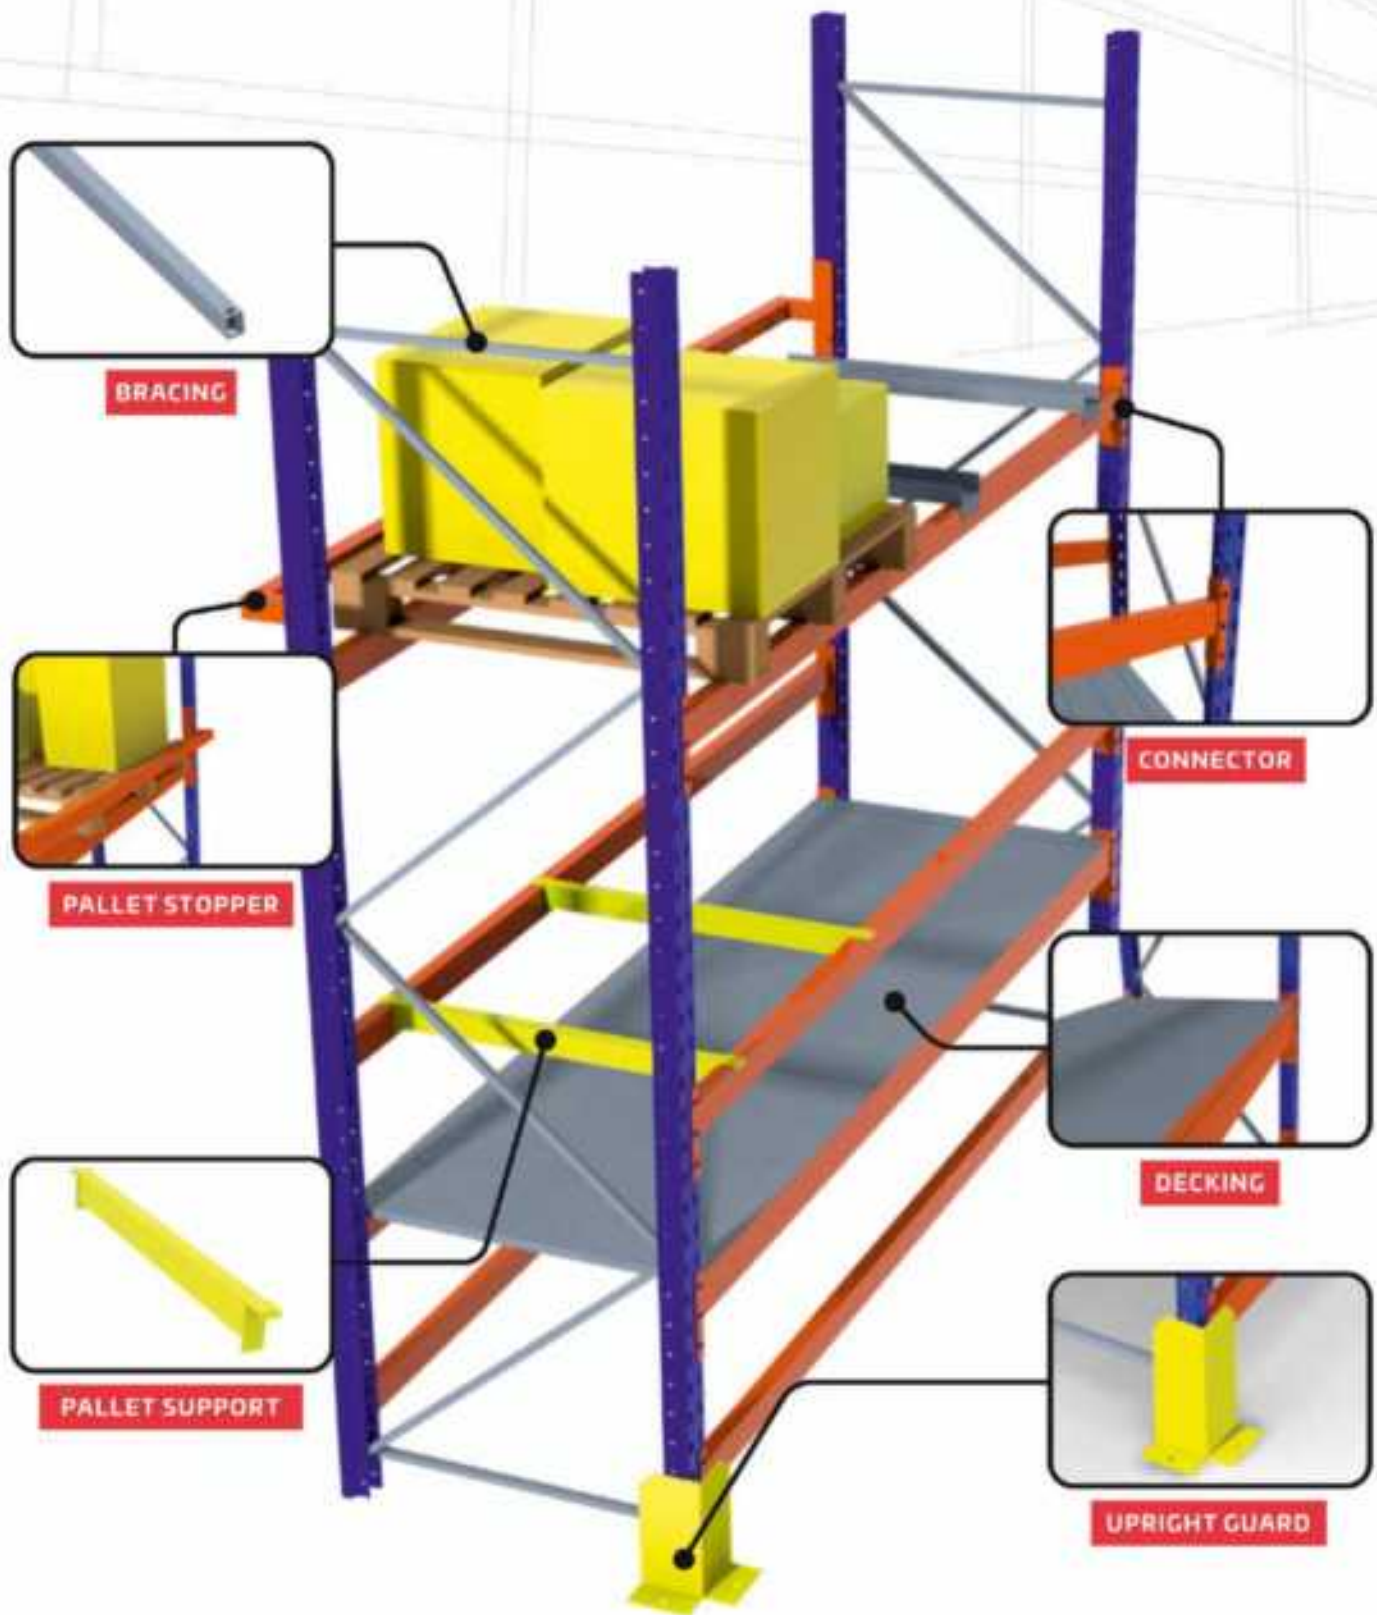

Drive in / Drive through / FIFO

Can be configured for LIFO/FIFO dispatch, Suitable for industries involved in batch production.

Radio shuttle racking RSR

Designed to swiftly carry pallets to the forklifts.
Remote controlled operations to move shuttles within the racks.

Racking Parts Diagram

Heavy Duty Racking Systems

Pallet racking

Pallet racking system is design to store material on pallet. This system is for store palletized material in multiple vertical levels. Mostly use in warehouses, manufacturing facilities, coldstorages, etc.

Cantilever Racking system

Cantilever rack is used for long products such as pipes, aluminium sections etc.

Medium Duty Racking

Long span racking

Long span rack is generally used for items pallet upto 500kg UDL/level

Medium duty shelving

Medium duty shelving is generally used for items pallet upto 500kg UDL/level

Slotted Angle Racking System

Slotted angle shelving

Slotted angle shelving is ideally used for low loading per level, like <math><150\text{kg}</math> / level. We are offering shelves in GP finish for life long maintenance free usage & powder coated slotted angles.

We are biggest shelving rack manufacturer in western India with more than 2000 shelves per day manufacturing capacity.

Slotted Angle:

40x40x1.6 , 40x40x1.8mm

Plate:

Industry First - Safe EDGE bending technology

Standard sizes (deep) : 300,375,450 mm approx.
special sizes will be made as per orders.

Slotted angle frame structure

Slotted angle frame structure is used for upto 150kgs UDL/level with great cost effectiveness and flexibility when limited space is available.

Mezzanine Floor

Heavy duty mezzanine floor

Mezzanine floor helps you effectively utilize the height of the building, to meet your needs of increased space. This system offers excellent interchangeability for relocation. It's time saving and cost effective solution as compared to RCC.

Slotted angle mezzanine floor

Ideal for upto 200kgs UDL/Sq.Mtr where limited space available.

Mobile compactor

File compactor

Mobile Shelving is an innovative space saving storage system with storage units mounted on mobile trolleys, thereby eliminating unproductive aisles and saving more than 80% of the space. It has a simple and elegant construction with minimal maintenance and no service costs.

Heavy duty compactor

Racks on wheels, designed for 100% accessibility to each pallet, while ensuring high density of storage.
